

Extending the Life of NUCLEAR POWER PLANTS

SOR Controls Group is a manufacturer of products qualified for the nuclear industry under the brands of **SOR Measurement and Control** and **PYRAGON Electronic Instrumentation** for reactors around the world.

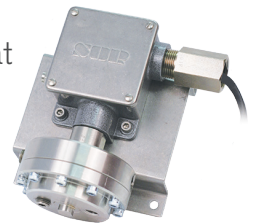

If you're operating a nuclear power plant, this issue may sound familiar: you have a product from a manufacturer that has discontinued its nuclear instrumentation line and it's no longer available on the market. No need to worry! SOR Controls Group offers a wide variety of nuclear qualified products for nuclear power generation companies across the country.

We have over 50 years experience in designing and developing engineered-to-order solutions. Whether you need products for specific processes, safety, or environmental concerns, our commitment to high quality, unmatched longevity makes SOR Controls Group the premier choice for custom nuclear products that fit your exact requirements.

- **Pressure and temperature switches**

- Maintains a 10CFR50 Appendix B and NQA-1 nuclear QA program since 1985.
- Mechanical pressure and temperature switches that are tested to the IEEE-323 and 344 standards.
- Capabilities to supply other pressure, level and temperature products based upon the customers requirements.

- **Electronic instrumentation**

- Maintains a CSA-N299.2-16 nuclear QA program since 2015.
- Extensive experience in providing form, fit and functional replacements for the nuclear industry.
- Offers design, manufacturing and testing of electronic instruments and custom OEM designs.

PYRAGON
ELECTRONIC INSTRUMENTATION

SOR Controls Group also offers industrial products such as level instrumentation, sampling systems, temperature sensors and thermowells.
